

HVAC engineered products

fans • dampers • air distribution • terminal units • sound control

TITUS

AIR DISTRIBUTION – Grilles/registers/diffusers; Flowbar, linear slots; laminar flow diffusers, security grilles, drum louvers, underfloor diffusers, VAV and thermal diffusers. Chilled beams and displacement ventilation.

TERMINAL UNITS – VAV, constant volume and fan-powered boxes; underfloor terminals and retrofit assemblies, pneumatic, electric, analog or DDC controls.

FAN COILS / AIR HANDLERS – Vertical stack, horizontal, floor and cabinet fan coil units. Horizontal and vertical belt-driven air handlers, indoor and outdoor, to 9,000 CFM.

TWIN CITY FANS & BLOWERS

FANS & VENTILATORS – Complete line of centrifugal roof and wall ventilators, grease fans, inline fans, ceiling fans, propeller fans & gravity vents.

CENTRIFUGAL & AXIAL FANS – Applied blowers, utility sets, tubular centrifugals, plug, plenum and industrial fans. Tube axial, vane axial, duct fans and mixed flow fans. Centrifugal and mixed flow lab exhaust systems.

UNITED ENERTECH

FIRE, SMOKE & COMBINATION DAMPERS – Complete line of U.L. Listed products.

CONTROL & BACKDRAFT DAMPERS – Commercial, Industrial and specialty.

LOUVERS AND PENTHOUSES – Extruded, fabricated, stationary, adjustable and more.

POWER/BALANCE SYSTEM – Patented remote air balancing system utilizing a hand held 9-volt battery operated power pack. No line voltage required.

AIR FACTORS

LINEAR AIR DISTRIBUTION – The widest selection of Air Bar[®] linear slot diffusers from the company that invented architectural air bar.

A-J MFG.

STAINLESS STEEL AIR DISTRIBUTION – Type 304 or 316 stainless steel grilles, registers, diffusers, linear slots, bar linear, drum louvers, security outlets, perforated screens, extractors and dampers.

AMERICAN AIR FILTER (AAF)

COMMERCIAL HVAC AIR FILTERS & HOUSINGS – Disposable, pleated, bag and HEPA filters; side access and bag-in/bag-out housings; mist eliminators, gas phase filtration and dust collectors. Filtration and APC products for every application.

AMERICAN ALDES

VENTILATION – The largest selection of Title 24 compliant ENERGY STAR[®] rated fans available; Single Port, Multi-Port, Blending, Distribution and Filtering.

VOLUME CONTROL – Constant Airflow Regulators compensate for changes in duct pressure caused by thermal stack effect, building pressure, filter loading, etc., eliminating the need for on-site balancing.

CARROLL MANUFACTURING

KITCHEN VENTILATION – APU (Air Purification Unit) for control of grease, smoke and odors permitting horizontal discharge of kitchen exhaust in high rise buildings.

COMMERCIAL ACOUSTICS

SILENCERS & NOISE CONTROL SYSTEMS – Sound attenuators, acoustical louvers and panels, "No-Fill" silencers, elbow silencers, transfer silencers and cone silencers.

COMMERCIAL AIRE PRODUCTS

SMALL AIR HANDLING UNITS – Unique belt driven units featuring double wall construction and internal isolation. Hydronic and DX coils, 2 Tons to 20 Tons.

CONTINENTAL FAN MFG. (CFM)

FANS – Specialty fans for unusual applications including axial, radial, inline, mixed flow and centrifugal.

IRIS DAMPERS – Interlocking steel plate design establishes new standards for air control and measurement. Ideal for clean rooms, labs and corrosive environments.

CRITICAL ENVIRONMENT (CET)

GAS DETECTION – HVAC systems, analog and digital. CO, CO2 and refrigerant.

DUCTSOX

FABRIC AIR DISPERSION – Uniform conditioned air for open ceiling architecture. LabSox[™] diffusers for critical environments and UFSox[™] for underfloor applications.

FANAM

INDUSTRIAL/COMMERCIAL – Corrosion resistant and explosion proof fans and blowers for methane gas, fume hoods, sanitation plants or any corrosive environment.

RESIDENTIAL/HI-RISE – Plastic and metal inline fans, dryer booster fans, bathroom and laundry exhaust, termination boxes, discharge grilles and linear perimeter louvers.

NEPTRONIC

STEAM HUMIDIFIERS – Immersion element type with permanent, cleanable, stainless steel chamber. Gas, electric and steam to steam.

DUCT HEATERS – Electric open coil or tubular designs. Full modulation without the high cost of SCRs.

PANASONIC

VENTILATION FANS – Whisper[®] series ceiling and inline fans featuring super quiet operation, long life TE motors and ENERGY STAR[®] ratings.

SAMSUNG DVM

VRF SYSTEM MULTI – Featuring Digital Scroll Technology and Heat Recovery for simultaneous heating & cooling, Samsung delivers the world's largest capacity (64 HP), highest COP, longest piping length, and highest energy efficiency rating, all in a 30% smaller footprint. Truly game changing.

POWERED AIRE

COMMERCIAL AIR CURTAINS – Complete line of heated and unheated models with standard stainless steel construction for long service life.

PRECISION AIR PRODUCTS

LAMINAR FLOW SPECIALISTS – Diffusers and systems for surgeries, isolation rooms and clean rooms. Components or complete system and ceiling design.

SEIHO

ARCHITECTURAL GRILLES – Aluminum round registers, spot diffusers and turbo nozzles. Available in a wide variety of colors, sizes and distinctive architectural styles.

YOUNG REGULATOR

DAMPING DEVICES – Remote BOWDEN cable control systems, motorized zone dampers, high quality operators, regulators, miter gears, worm gears, hardware and assemblies. New EBD series electronic balancing dampers.
